

PRONET

ProNet is designed to conform to the anatomy of any size arm, pediatric or adult to protect the patient's vascular access device from potential dislodgement or possible removal.

ProNet may be used to cover and protect PICC lines and peripheral lines from getting caught on items that could cause a potential injury risk to patient's vascular access device or the patient.

ProNet provides patients with increased comfort and security.

ProNet is a soft tubular gauze netting that replaces adhesive tapes and wraps for protecting vascular access devices or retaining wet and dry dressings.

ProNet tubular gauze won't constrict on the patients arm.

ProNet is conveniently packaged and cut into 3 individual strips 8" in length.

ProNet is available in a universal size to fit your medical requirements.

ProNet is LATEX-FREE

ProNet is made in the USA 

Catalog# 2GPN6, 500/case, 5 bags 100ct.
